

# GT-13003

## Underhood Light

### Instructions

# GT-13003

**Please read instructions before using.**

## Instructions for use

**Caution: Remove plug from electrical receptable.**

1. Slide the cord end cap completely off the housing of the light and several inches down the cord to expose the switch bracket.
2. Remove the two screws securing the switch bracket.
3. Remove the end cap located at the opposite end of the housing.  
Starting at the end of the housing located opposite from the cord, gently push the lamp assembly several inches towards the cord.
4. Continue pushing until the black round lamp socket located towards the cord end of the housing is completely exposed. Note the routing of all wires.
5. Firmly grasp the lamp socket and white harness wire together and slide the remainder of the lamp assembly completely out of the housing.
6. Replace the lamp.
7. Reassemble in reverse order.
